2006

QBH entered the fastener industry

2014

Establishment of QBH Company

Jiaxing City Qunbang Hardware Co., Ltd. is seated in Jiaxing City, Zhejiang Province with a good location and convenient transportation, where next to Shanghai Port, Ningbo Port and Zhapu Port. The company mainly produces nuts and bolts. Products of a wide range of standards are available, such as DIN, ANSI, ASME, JIS, UNI, ISO, AS, BS, GB, etc. Available products' mechanical property are as follows. Metric nuts: CL.6/8/10. Inch nuts: Grade 2/15/18, A194-2H, A194-2HM. Metric bolts: CL.4.8/5.8/6.8/8.8/10.9/12.9. Inch bolts: Grade 2/5/8, ASTM A325.

QBH from its establishment to the present, after ten years of development, it is equipped with perfect testing equipment, and SGS and TUV have a good cooperation, each batch of products is accompanied by a 3.1 or 3.2 certificate, further escort the quality of the company.

2015

QBH shares in a number of enterprises

In 2017, we registered the trademark “QBH” in the CHINA\EU\United States, and has six fastener product patents, has obtained the Zhejiang Province science and technology small and medium-sized enterprise certificate as well as the ISO9001:2000 certificate. With the continuous development and expansion of the company, as well as customer demand for product diversification, on the basis of its original production, in order to further enhance the potential for cooperation with customers, as well as to provide competitive prices. Starting in 2015, QBH has taken part in several fastener enterprises one after another, the product variety is more abundant and the price is more advantageous, and the quality can also be well controlled. QBH has always been to provide customers with efficient and convenient service and quality products, and create a pleasant trading process for customers for the mission, deeply participate in customer construction projects and make progress together with customers, this means that we need to provide better and more cost-effective solutions, so as to help customers stand out from the competition.

QBH promises to always provide you with excellent quality, efficient service and very competitive prices. We believe that the cooperation between us is not only based on business, but also hope that we can open new markets on the basis of win-win situation. And thank all the customers in the past to give us great support and help, make us grow up gradually, at the same time also hope that in the near future, and you can establish new business relations.

2016

Registered China, the United States and the European Union trademark

2017

QBH is ISO9001:2000 certification

2017

QBH has 6 fastener product patents

2018

Zhejiang Science and technology small and medium-sized Enterprise certificate

COMPANY ADVANTAGE

QBH hardware with advanced production equipment, automatic production technology, professional manufacturing system, scientific production process, large-scale production to improve product quality and competitiveness, to better serve customers.

BOLT SERIES

HEX SOCKET BOLTS

Socket head cap screws are commonly used in machine assembly for removable panels and parts. They have a round cap with a hex head and are tightened with a socket wrench drive. Longer caps are easier to see when fastened, while button and flat head caps are less likely to snag clothing or linkages. Cap screws with a black oxide or armor coat finish resist corrosion.

HEAVY HEX BOLTS

Heavy hex bolts are heavy profile hexagon bolts with large width across flats and high head height. Also known as heavy hex head bolts or heavy hex structural bolts, these heavy hex bolts are commonly manufactured in high tensile grade 5, 8, 8.8, 10.9, 12.9, a193 grade b7, b7m, b8, b8m, b16, a320 grade l7, l7m, stainless steel and other material.

HEX BOLTS

Hex Bolts are bolt fasteners with six sided hexagon head and externally threaded body. Hexagonal head profile enables easy wrenching while putting enough torque to the bolting joint. Hex bolts are used with hex nuts or a tapped hole. Hexagon head bolts, Hex machine bolts are other alias of Hex bolts.

PALLET	solid wood pallet, plywood pallet, ton box/bag, etc	
PACKING	bulk/boxes in cartons, bulk in polybags/buckets, etc	

HEX NUTS

Hex Nuts are six sided hexagon nuts, used for tightening bolts and screws. Hex nuts are often found with hex headed bolts. However its use is not limited to only hex headed bolts. Hexagonal body enables easy wrenching while putting enough torque to the bolting joint. Hex nuts can be used with all kinds of bolts. Hexagon nuts, six sided nuts are other alias of hex nuts.

PACKING	bulk/boxes in cartons, bulk in polybags/buckets, etc	

THIN/JAM NUTS

Jam Nuts are low profile, short hex nuts, with thickness half of the standard hex nuts. Jam nut is coupled with standard hex nut as a back up nut or lock nut where it is jammed up against the standard hex nut to lock the two in place. Jam nuts are also known as thin hex nuts, hex jam nuts, jam lock nuts or thin hex lock nuts.

FRIVOLOUS

LOCKING

AIRTIGHTNESS

LARGE / HEX FLANGE NUTS

Flange Nuts are a type of nuts with hex profile body and a large flange like base at one end that acts as an integrated, non spinning washer. This flange washer is used to distribute pressure of the nut over a greater surface area and also ensures that the nut stays tight. Flange nuts are unidirectional fasteners that can be used in only one direction.

SQUARE NUTS

Square Nuts are four sided square body nut fasteners with centre tapping. Square nuts are often used with square headed bolts. However its use is not limited to only square headed bolts. Square body profile is can sustain less torquing force as compared to 6 sided hexagon. Square nuts are also known by 4 sided nuts and square body nuts..

LOCK NUTS

Lock Nuts 2 results found that include 27 products Locknuts lock fasteners in place to keep them from backing out or loosening due to vibration or torque. A locknut is commonly used in place of a standard nut on vibrating machinery and when joining soft materials.
