

IBUKI MH550H Piston horn is electrically driven, and employs a motor to drive reciprocating piston mechanism to produce a powerful tone. The motor is only operated on blowing for low power consumption. MH550H is just required electrical wiring without pneumatic connections for installation on the foremast. Heater and snow guard are available for use in cold area.

MH550

Type	Protection	Fundamental Frequency (Hz)	Sound Level 1/3rd Octave (dB/1m)	Voltage		Length (mm)	Horn Diameter (mm)	Weight (kg)
				Motor	Heater			
MH550	IP56	135	Over 138dB	AC220V 3Φ 18.6A	AC100V / 220V	877	580	167
MH550-H (With heater)				AC440V 3Φ 9.3A				176

Anti-vibration mount

Option

Anti vibration rubber mount reduces the vibrate transmission to the rest of ship's hull.
