

IBUKI SF Series strobo light employs a xenon discharge tube to produce an extremely bright flash signal. Flash times are available from 60 to 120/min. It is stable against valiant temperature and power supply. SF4 is waterproof large body for outdoor exposed to saltwater. SF1 is middle size and easy-setting. SF6 is compact enough to set on limited space. Besides use for the single use with 5 kinds of globe colour, it can be combined with IBUKI other signal devices. High power lamp is available with variant power for the exact demands.
