## Bimetallic Lug CAS Series

The solid palm eliminates the ingress of moisture.

- The barrels are chemically treated to reduce contact resistance and corrosion.
- Prefilled with jointing compound.
- Friction welded.
- Material: Cu≥99.9%, Al≥99.5%.

## Bimetallic Lug DTL-3 Series

The solid palm eliminates the ingress of moisture .

Prefilled with jointing compound.

- Material: Cu≥99.9%, Al≥99.5%.
- Suitable for screwing non-tension aluminum connector.
- Using Cu-washers in humid areas and for pre-rounded sector shaped conductors.
- With Cu eye in screw-on and markings for correct crimping.
- Material: Cu≥99.9%, Al≥99.5%.

## Mechanical Aluminium Bolted Lug AUL Series

In accordance with DIN46329.  
 Mechanical Lug, no needs of crimping tools and the attendant operator skill.  
 Torque controlled sheared off bolts guarantee a good electrical contact.

- Material: AL $\geq$ 99.5%.
- Surface: Electro tin plated.

## Bimetallic Connector (Link) GTL Series

Solid centre barrier.

- The links can be designed to join four core aluminium sector conductors to conventional stranded copper conductors.
- Prefilled with jointing compound.
- Friction welded.
- Material: Cu≥99.9%, Al≥99.5%.

## Aluminium Connector AMB Series

Mechanical Connector, No needs of crimping tools and the attendant operator skill.

- Only a socket spanner or a wrench is needed.
- Torque controlled sheared off bolts guarantee a good electrical contact.
- Wide application Range.
- The solid palm eliminates the ingress of moisture.
- Prefiled with jointing compound.
- Material: Aluminium Alloy.
- Surface: Electro tin plated.

## Fast Connector

It can be widely used in fast connection of overhead line cables (aluminium strand, steel core aluminium strand, steel core aluminium strand insulated overhead cables, aluminium core crosslinked polyethylene insulated overhead cables).

- Slip strength is not less than the 95% of the conductor's U.T.S.
- No special installation tools required.
- ANSI C119.4

## Bimetallic Parallel Groove Clamp CAPG Series

CAPG series bimetallic parallel groove clamp is designed to connect two parallel bare conductors. Aluminium alloy conductor for main side and copper conductor for tap side.

- Hot compressed Cupal plate ensures good electrical contact and prevents corrosion.
- Cross-grooved clamp channels improve mechanical pullout strength and electrical contact.
- Spring washers maintain pressure even at dilatation caused by temperature changes.

## Aluminum Parallel Groove Clamp APG Series

APG series aluminum parallel groove clamp is designed to connect two parallel bare aluminium conductors.

- Pressure pad ensuring uniform pressure along the clamp.
- Cross-grooved clamp channels of universal clamp type improve mechanical pullout strength and electrical contact.
- Connector bodies are made of corrosion resistant, high strength aluminium alloy .
- Bolts and nuts made of hot dip galvanized steel.

## Parallel Groove Clamp CUPG Series

CUPG series parallel groove clamps are used for tapping or joining hard drawn or annealed copper conductors.

- The clamps are forged, not extruded, which creates a high strength clamp.
- Slotted holes allow adjustment for varying conductors on each side.
- High strength bolts, and tapped threads in the clamp base allow tightening to high torques with a single spanner.
- Forged design allows "gripping grooves" to be forged into the conductor clamp area, for greater conductivity, and pull strength.

## Copper Tube Terminal Crimping Tools

The copper tube terminal crimping tools are used for non-welding and standard electrical connection.

- The mould of the crimping dies is made of SCM-40 hardest tool steel.
- It is with characteristics of long life, accurate bore diameter and good crimping effect.

## Split-unit Hydraulic Plier

Split-unit hydraulic plier is specially designed for inside and outside power transmission and distribution project, various kinds of connecting terminals, overhead and underground cabling.

- Crimping high voltage cable sleeve, wire grips, un-insulated terminals, hexagon terminals, crimped part tight and uneasy to break out in good conductivity.
- Standard seven sets of die assembling.
- Dies could be ordered and available in any sizes.
- The oil pipe couple fitted with PT3/8" thread.
- To be worked with pedal pump, manual pump and electric driven hydraulic pump.

## Mechanical Crimping Tools

Mechanical crimping tools are applied to overhead distribution and press connection for copper&aluminum lug and connector.

- Hexagonal mould is adopted to ensure tight press connection.
- Good electric conduction and non-easy shedding.

Item No.	Press-joint Range (mm <sup>2</sup> )	Max Pressure(T)	Max Travel(mm)	Tool Disposition
JQ-18A	16-240	18	14	16, 25, 35, 50, 70, 95, 120, 150, 185, 240
JYJ-240	6-240	14	12	6, 10, 16, 25, 35, 50, 70, 95, 120, 150, 185, 240

## Split-unit Hydraulic Hole Digger

SYD-20 Split-unit hydraulic hole digger is specialized for corner steel, flat steel, brass plate and other metal material's hole digging, especially for electric power building and other industry's filed operation.

Item No.	Power(T)	Thickness(mm)	Depth(mm)	Weight(Kg)	Tool Maching
SYD-20	26	≤10	70	16	8.5, 10.5, 13.5 17.5, 20.5

## Split-unit Hydraulic Cable Cutter CPC-40A, 52A, 75A, 100B

• Special copper and aluminium wire tool is not able to cut off steel rope or cord.

## Hydraulic Cable Cutter

## Hydraulic Pumps

Used together with the crimping heads and can be operated easily.

- Smooth-running and effort-saving for fast operation.
- The pressure can be kept at halted state and high pressure safety protection hydraulic valve is designed inside the pump.
- Oil must be replaced every half a year.

Type	Max output pressure		Output of oil		Oil capacity	Weight	Carton size
	Low pressure	High pressure	Low pressure	High pressure			
CP-700	20kg/cm <sup>2</sup>	700kg/cm <sup>2</sup>	13cc	2.3cc	900cc	9.5kg	630×200×200mm

## Hydraulic Punch Driver

The finished distributor, on-off case and plate can change the specification at any time. It can change the size of the tools simply and will not destroy the surface at all after drilling hole.

- #7 mechanical oil.
